

*Here is your
July 1964
Sigma Price List!*

It's still the familiar 6"x9" size which fits easily on any book shelf or in your laboratory coat pocket. We continue to refuse to bow to governmental directives which specify that *our* Price List *must* be 8" x 11" before a U.S. Government contract will be awarded.

Many new and interesting compounds have been added to this Price List. We believe you will find it rewarding just to browse thru it.

For your convenience, the pink pages at the front contain lists of items in various useful categories.

The pink pages at the back contain lists of kits and individual reagents for the now famous **SIGMA ENZYME ASSAY PROCEDURES**. Many of these were pioneered by Sigma and are now in daily use in laboratories throughout the world. New and interesting procedures have been added in this section.

Please help us to help you by noting the enclosed change-of-address card. If it applies to *you*, please fill it out and mail it to us. Thank you.

**STILL
IT'S / A PLEASURE DOING BUSINESS WITH SIGMA**
